

The Anatomical and Histological Dissection of the Human Ear: In the Normal and Diseased Condition (Classic Reprint)

Excerpt from The Anatomical and Histological Dissection of the Human Ear: In the Normal and Diseased Condition
A Glance at the original work convinced me that I had to deal with a task different from that which falls to the lot of one who undertakes to render into readable English an ordinary handbook of Otology, where considerable latitude of style is allowed. In the present work, where precise rules as to special dissections and modes of preparing the various parts of the organ of hearing are given, it has frequently been unavoidable to translate almost literally. I hope, however, that reasonable limits have not been exceeded when it was found advisable to sacrifice smoothness of style to faithful rendering of very minute, though most important details, in the exhaustive treatment of the subject by so eminent an authority as Professor Politzer. Attention is called to the lettering in 29 of the 164 illustrations, which were printed from cliches used for the English edition of the Authors Text-Book of Diseases of the Ear. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
