Mediaeval Music

PREFACE. IN compiling this elementary treatise on * Mediaeval Music many and great difficulties have had to be coped with; to solve them the best authorities have been appealed to, and, where such failed to supply the particular information sought for, that opinion which on mature consideration appeared most feasible has been given. The difficulties in the treatment of the subject have been largely increased by the amount of prejudice and ignorance displayed by many especially papistical writers on musical subjects, who have never troubled themselves independently either to trace out or follow up the history of the very interesting subject of Mediaeval Music. The short chapter on Harmonic or Monodic Music has been inserted with the object of showing in as clear and concise a manner as possible the development the science of harmony had attained by the end of the sixteenth and beginning of the seventeenth centuries. Any attempt to elucidate a complex and neglected subject like the present one, must of necessity call forth criticism both from those who are capable, and from those whose blind prejudice renders them incapable of expressing an opinion on the subject. That this elementary work is perfect is not for one moment claimed, the writer being painfully aware of the inadequacy of his efforts to attain to such a desired result ; the kind indulgence of the press and of the music-loving public for all shortcomings on his part, with a sincere desire to have made a contribution as accurate as possible on a little known subject, is the desire of the writer, who, in conclusion, tenders his grateful thanks to Mr. T. L. Southgate and to Dr. Wickham Legg, F.S.A., for looking over certain proof sheets, and to the former for supplying valuable notes on the Music of Egypt and of the East generally, and to the latter for much learned information and advice on Liturgical matters generally. ...
